

Exder update February 2025

Exder was updated as of February 22 (update window 22:00-00:00 pm. CET).

All messages through Exder during the update were queued and processed once update was completed.

You do not need to do anything, your Exder service is automatically updated to the newest version.

The update addresses the new GDSN article information version 3.1.30.

Some minor bugs are also resolved, for example "session error" in some functions.

And improvements, such as enhanced functionality regarding e-mail addresses when sending PDF-invoice.

Exder now also support EDI with Lidl and Coop Denmark.

If you have any questions, you are as always welcome to contact our support.

You are also welcome to visit our status operational page

[Tungsten Automation EMEA Status](#) and monitor the status for our various products.

Best Regards,

Tungsten Automation Exder team
